

FUNCTIONAL INTEGRATED NEEDLING FOR PAIN MANAGEMENT

"Dr. Scappaticci's clinical pearls and method of instruction made this the best course I ever attended. It will be easy for me to implement first thing Monday morning" Dr. S. L., Chiropractor, Dublin Ireland

Pain Management Workshop:

October 12-14, 2012

Athletes Performance Frisco, TX

The FUNCTIONAL INTEGRATED NEEDLING Training Program has been developed by Dr. Scappaticci and Dr. Ma, founder of the American Dry Needling Institute and a world renowned educator and published writer. The training program builds upon Dr. Ma's unique, pioneering method of dry needling, which is based on his 40 years of clinical experience and 30 years of neuroscience research. Dr. Ma's dry needling system integrates and improves upon older, traditional treatment approaches to create an assessment and treatment system that is more effective and easier to learn. Mastering Dr. Ma's approach can be accomplished after one weekend of training.

Dr. Scappaticci has 20 years of needling experience and clinical practice working with Olympic and professional athletes from around the world and has worked with the members of the National Hockey, Baseball, and Football Leagues and the National Basketball Association. A highly sought-after instructor, he has worked closely with Dr. Ma

The purpose of the Integrated Dry Needling Training Program is to develop the knowledge and clinical skills required to effectively diagnose and treat painful neuromuscular conditions in any region of the body. Workshop participants will be able to immediately integrate dry needling techniques into their clinical practice and will be able to:

- Use Dr. Ma's unique method of dry needling
- Understand how dry needling works and how it controls pain
- Use Dr. Ma's assessment system to help accurately determine treatment plans
- Locate targets used to effectively manage painful conditions in all regions of the body
- Safely and painlessly insert needles using dry needling insertion techniques
